

Minder

simplifying IT

All-in-one solution to monitor
Network, Server, Application & Log Data

Simplify the Complexity of Managing Your IT Environment...

To help you ensure the availability and performance levels your organization needs from your IT infrastructure, Minder offers an integrated IT monitoring suite which provides a single point of management for an entire IT infrastructure. Minder's unified monitoring platform helps you manage networks, including wireless, as well as applications, servers and virtual assets. In addition, network configuration management, layer 2 and 3 discovery, traffic flow monitoring and more come together in one package that is easy to install, quick to deploy and can be tailored to your environment. Minder offers enterprise grade product at lowest TCO (Total Cost of Ownership) in the industry.

Unified Monitoring

Minder is designed to bring power and simplicity to the process of monitoring correlated network, server and application infrastructure. Highly scalable and multi-tenant architecture allows organizations to monitor end to end components in physical, virtual and cloud environments. Minder provides logical business service views and real-time dashboards for different user groups.

Unified Monitoring Dashboard

Business Service Monitoring

With dynamically or logically grouping network components, Minder provides complete visibility into critical business services. Minder monitors every layer, every tier of the infrastructure supporting the business and helps you locate & correct abnormally performing tiers of the IT infrastructure before they impact the user experience.

Compliance Management

Minder captures and manages log data from any source in real-time, allowing users to view, search, and investigate logs any time for troubleshooting; covering all aspects of security, compliance and network operation by improving mean time Investigation and resolve issues.

Minder offers extensive reporting capabilities in tandem with compliance mandates instead of delivering stacks of generalized reports and comply

SLA Management

Administrators can create SLA with multiple device, server and application under one Business process, enabling much detailed granular performance measurement & identifying the actual events that affect the service level.

SLA monitoring and reporting tool will let you perform a dry-run before accepting an SLA by determining its viability based on historical data. It also enables users to create user-centric data widgets for multiple SLA.

Network Monitoring

Complete network management software with configurable discovery rules, extendible monitoring templates. Minder also offers visibility into bandwidth usage and network slowdowns in complex environment.

Server & Application Monitoring

Minder can discover and monitor not only System level performance data, but also the host operating system logs and underlying hardware health metrics. Easy-to-use interface gets you up and running quickly.

Cloud & Virtualization Monitoring

Monitors each component in the cloud and virtual environment, allowing you to identify if they are not delivering the expected service. IT operators need to be assured whether resources will be in place to handle an increasing number of requests.

Log (SIEM) Management

Minder proactively delivers immediate correlation between collected performance data and logs. Minder has automatic rules to monitor critical security logs collected from various Eventlog and Syslog based components.

Configuration and Change Management

Minder provides an integrated solution for automating and controlling the entire life cycle of device configuration management. The efficient backup solution makes change detection, device configuration comparison easier and faster.

Flow Monitor

In-depth visibility into your network traffic for every device, allowing you to analyze, alert and report on network traffic and bandwidth utilization in real-time to ensure quality of service.

About Minder

Minder is an IT performance management suite for businesses and organizations to monitor and analyze performance across multiple applications and network resources. Minder helps you take control of your dynamic IT infrastructure by cross-domain monitoring, multiple product support, SLAs, forecast analytics and other impressive features. Driven by innovation, Minder is built from the ground up to provide next generation IT management. Minder is cost effective management solution can be deployed in less than hour and are designed to avoid dependence on any server host.
